RECENT NEW ORDERS BOOST ORDER BACKLOG TO \$20.5 MILLION

Saskatoon, SK May 13, 2003 - International Road Dynamics Inc. (IRD) is pleased to announce that it has received a CDN \$430,000 contract from the Transportation Commission of Wyoming / Wyoming Department of Transportation. The project includes the upgrade of three existing IRD WIM (Weigh-In-Motion) Automated Truck Inspection Systems. Two of the stations are located near Cheyenne and one near Evanston, Wyoming. All three systems were installed in the early 1990's for the Wyoming Department of Transportation. The scope of work consists of WIM scale refurbishment, replacement of WIM Electronics with the most current operating system and technology, and new fiber optic communications.

The Wyoming Truck Inspection Stations utilize IRD's patented Single Load Cell (SLC) Weigh-In-Motion Scales. IRD's Single Load Cell WIM technology is recognized as the most accurate and reliable Weigh-In-Motion available.

Mr. Terry Bergan, IRD's President and CEO, states "Wyoming has been a long time customer and we are pleased with this continued commitment from the Department of Transportation. These upgrades are the result of a very long, mutually beneficial relationship, and will ensure that the State handles truck traffic at the Truck Inspection Stations in the most efficient and safe manner possible, while at the same time protecting its State's highway infrastructure."

With this new order, other recent contract awards from the States of South Dakota and Indiana, as well as additional new business received over the past few months, IRD's backlog of confirmed orders has increased to approximately CDN \$20.5 million from CDN \$16.7 million at year-end.

"We are very pleased with our progress in obtaining new business, and look forward to adding to the backlog as the year progresses," Mr. Bergan concluded.

IRD is a highway traffic management technology company specializing in supplying products and systems to the global Intelligent Transportation Systems (ITS) industry. IRD is a North American company based in Saskatoon, Saskatchewan with sales and service offices throughout the United States and overseas. Private corporations, transportation agencies and highway authorities around the world use IRD's products and advanced systems to manage and protect their highway infrastructures.
