IRD RECEIVES NEW iTOLL & WIM CONTRACTS IN INDIA FOR \$1.86 MILLION

Saskatoon, SK May 4, 2005 - International Road Dynamics Inc. (IRD) announced today that it has recently received three separate contracts to supply its iTOLL Toll Collection System and WIM System to clients in India, with a total value of approximately **CDN \$1.86 Million**. Contract information is as follows:

1. From INTERTOLL ICS CECONS O&M CO. PVT. LTD. in New Delhi, to supply and install 4 high speed Bending Plate WIM Systems, and 40 lanes of Toll Audit Systems. The total value of the contract is approximately **CDN \$740,000**. This project will deliver the first high speed WIM (HSWIM) systems on national highways in India as the government mandates the use of WIM technology to collect data and enforce vehicle overloading.

The toll audit systems will be implemented at toll lanes on the same highway sectors, and will enable NHAI (National Highways Authority of India) to audit the collection of toll revenues, which are essential to fund the operations and maintenance of these highways. The systems are expected to be installed and operating by October 2005.

2. From Ideal Road Builders (IRB) in Mumbai, to supply a total of 28 lanes of iTOLL to 3 separate projects: Pune-Nasik, Vadgaon-Chakan and Thane-Ghodbunder, located in Maharashtra state, for a total of **CDN \$860,000**. IRB is a valued and long standing client of IRD's and with this contract will increase to 90 the number of lanes of iTOLL under its control. The three projects will be progressively implemented from August to November in 2005.
3. From RBM Pati Joint Venture of Calcutta, to supply 14 lanes of iTOLL for **CDN \$260,000**, in West Bengal state. This project is expected to be completed by August of 2005.

Mr. Terry Bergan, IRD's President and CEO noted, "With these orders, we will have supplied 160 lanes of our toll audit systems, and 195 lanes of iTOLL, to clients in India, and now will implement the first HSWIM systems on Indian National Highways. Through our office in New Delhi, we provide full support to our customers in India and South Asia, and this local support is a key reason why we have been chosen for all 3 contracts. We also expect that these new projects will generate significant future maintenance revenues. We are proud to have received these prestigious new contracts, and look forward to our continued participation in the aggressive highway infrastructure development program of the Indian government."

IRD is a highway traffic management technology company specializing in supplying products and systems to the global Intelligent Transportation Systems (ITS) industry. IRD is a North American company based in Saskatoon, Saskatchewan with sales and service offices throughout the United States and overseas. Private corporations, transportation agencies and highway authorities around the world use IRD's products and advanced systems to manage and protect their highway infrastructures.
