### For Immediate Release

#### **IRD WINS \$1.4 MILLION WEIGH-IN-MOTION CONTRACT IN NEW BRUNSWICK**

**Saskatoon, SK May 18, 2005** - International Road Dynamics Inc. (IRD) announced today that it has been awarded a contract by the New Brunswick Department of Transportation for the supply and installation of two Automated Truck Weigh Stations. The IRD systems will allow prescreening of commercial trucks in the main lanes of the highway at highway speed. The project is valued at approximately CAD\$1,440,000, and is expected to be completed by the fall of 2005.

The project is being funded jointly by the Province of New Brunswick and Transport Canada under the Intelligent Transportation Systems' Partnership funding program.

The new contract follows the successful installation of a similar system at the Province's Longs Creek facility in 2002. The new contract includes the supply and installation of IRD's patented Single Load Cell Weigh-In-Motion (WIM) Scales, video verification system, vehicle movement compliance system, and operational software. The systems will allow trucks that meet the Provincial size and weight limits to bypass weigh stations at highway speeds, thereby reducing the number of trucks that are required to stop at the inspection stations. This will save the industry considerable time and money, as well as reducing fuel and diesel emissions necessary to stop and start trucks for these compliance checks.

Mr. Terry Bergan, IRD President and CEO commented: "We are pleased to be working with the Province of New Brunswick and Transport Canada on this important initiative. IRD technologies will significantly improve the efficient movement of goods in the Province and provide significant cost savings to both the Province and the commercial transport industry."

IRD is a highway traffic management technology company specializing in supplying products and systems to the global Intelligent Transportation Systems (ITS) industry. IRD is a North American company based in Saskatoon, Saskatchewan with sales and service offices throughout the United States and overseas. Private corporations, transportation agencies and highway authorities around the world use IRD's products and advanced systems to manage and protect their highway infrastructures.
