IRD AWARDED CAD \$3.3M CONTRACT WITH TRANSPORT CANADA

Saskatoon, SK – July 13, 2006 – International Road Dynamics Inc. (IRD) announced today that it has been awarded a CAD \$3.3M contract by Transport Canada to supply Weigh-In-Motion (WIM) and Traffic Data Collection Systems at various locations throughout Canada. This is a two year contract with the option for a third year valued at an additional CDN \$535,000. The contract is part of the National Roadside Surveys (NRS) initiative by Transport Canada and the Provinces to collect heavy truck data to determine intra and inter-provincial National Highway System (NHS) infrastructure and Canada-U.S. border crossing traffic flows. An additional aspect of the contract is Transport Canada's Full Cost Investigation which focuses on the "full costs" of transportation.

IRD will install, maintain, collect and report data from 63 WIM sites and 17 non-intrusive sensor sites under this contract. A major portion of the contract will be the deployment of WIM and non-intrusive sensor technology in the Quebec City-Windsor Corridor. Other installations will be at border sites with the United States and in provinces across the country. The contract includes both permanent and temporary installations.

The WIM sites will utilize IRD's 540 WIM Electronics and Piezoelectric Sensors. IRD will maintain and service the WIM and non-intrusive sensors sites, collect the data, and regularly transfer the data and reports to Transport Canada.

IRD President and CEO, Mr. Terry Bergan, states, "We are looking forward to working closely with Transport Canada and the provinces on this large and important project, the country's largest single deployment of Weigh-In-Motion technology. The project is based on our experience with turn-key data collection services employed in New York and other states, and builds on our success in these other jurisdictions."

IRD is a highway traffic management technology company specializing in supplying products and systems to the global Intelligent Transportation Systems (ITS) industry. IRD is a North American company based in Saskatoon, Saskatchewan with sales and service offices throughout the United States and overseas. Private corporations, transportation agencies and highway authorities around the world use IRD's products and advanced systems to manage and protect their highway infrastructures.
