IRD RECEIVES CONTRACTS IN CHINA VALUED AT CAD\$2.8 MILLION

Saskatoon, SK October 3rd, 2006 – International Road Dynamics Inc. (IRD) announced today it has received two new contracts from Xuzhou PAT Control Technology Co., Ltd. (“XZPAT”), the Company’s business partner in Jiangsu, China, for the supply of bending plate Weigh-In-Motion (WIM) scales. The contracts have a total value of approximately CAD\$2.1 million, and bring the value of contracts received from XZPAT for bending plate scales to date in 2006 to CAD\$2.8 million.

Under the new contracts, IRD will supply bending plates for the purpose of dynamically weighing and screening commercial vehicles for overloading at toll facilities. Vehicles identified by the WIM system to be in violation of the weight regulations are charged a fine proportionate to the degree of overloading. These contracts bring the number of bending plate scales supplied by IRD to China to approximately 1300 units. The scales from the new contracts are scheduled to be delivered and installed in the fourth quarter of 2006 and first quarter of 2007.

Mr. Terry Bergan, President and CEO of IRD notes, “These are very significant new contracts for IRD and reaffirm our commitment to expand our presence in important offshore markets such as China. The application of WIM at toll facilities is growing rapidly in China and we see opportunities for similar programs in our other offshore markets. We are very excited about this opportunity and look to forward supporting the efforts of our business partner XZPAT, with whom we have recently signed a new distribution partnership agreement.”

IRD is a highway traffic management technology company specializing in supplying products and systems to the global Intelligent Transportation Systems (ITS) industry. IRD is a North American company based in Saskatoon, Saskatchewan with sales and service offices throughout the United States and overseas. Private corporations, transportation agencies and highway authorities around the world use IRD's products and advanced systems to manage and protect their highway infrastructures.
