SECURE YOUR FACILITIES WITH IRD'S UNDER VEHICLE SURVEILLANCE SYSTEM (UVSS)

February 21, 2008 - Protect your facilities against threats with the UVSS!

To the passing motorist, the UVSS (Under Vehicle Surveillance System) will appear to be a simple metal speed bump, when in reality it is a high-quality surveillance instrument. The UVSS is designed to scan, monitor, and digitally record clear, high-resolution video images of the entire underside of a passing vehicle.

Some of the locations where the UVSS has already been installed include:

- USAF Bases in Schriever (USA), Patrick (USA), Ramstein (Germany) and Aviano (Italy)
- Fort Bragg, North Carolina
- DLA (Defense Logistics Agency), Ohio
- DOC (Department of Corrections), Washington, DC
- Commercial & DOD Ports of North Carolina
- Eurotunnel
- Frankfurt Airport, Germany
- Disneyland in Anaheim, CA
- Numerous other systems world-wide

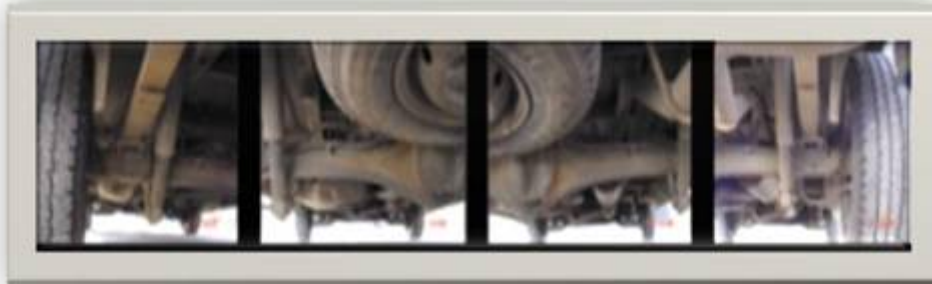

Photo taken by UVSS of the underside of a vehicle

The UVSS allows the user to view the entire length of the vehicle in real-time and full color. These video images can help in the detection of attached packages, explosives, and other objects. The steel ramps are designed to withstand harsh environments, rugged terrain, and extreme temperatures and can be used in both permanent and temporary applications.

If you have any questions or would like more information on this product or any of IRD's other products please contact Chris Pepin of our product sales team at (877) 747-3487 or email: chris.pepin@irdinc.com.
