ITS TECHNOLOGIES FROM IRD ENHANCE ENVIRONMENTAL PERFORMANCE

May 21, 2009 - Throughout the United States, and in 2008 alone, IRD's Weigh-In-Motion Systems have resulted in significant pollution reduction and estimated fuel savings of over \$6 million. In the State of Oregon alone, a report indicates a major reduction in emissions when using Weigh-In-Motion (WIM) at its weigh stations. Emission testing by the Oregon Department of Environmental Quality (DEQ) shows that trucks are far less polluting and far more fuel efficient when they use the Green Light Weigh-in-Motion system to avoid stopping at weigh stations. The report on the Oregon Department of Transportation website <http://www.oregon.gov/ODOT/MCT/GREEN.shtml> reveals the following:

1. A 36% to 67% reduction in each of the pollutants monitored - particulate matter, carbon dioxide, nitrogen oxides, carbon monoxide, and hydrocarbons - when trucks stayed at highway speed past a weigh station.
2. Trucks that avoided the deceleration and acceleration necessary to enter and exit a weigh station also experienced a 57% improvement in fuel economy.

The Oregon Green Light Pilot Project was initiated in 1995 to deploy automated pre-clearance weigh stations to improve the enforcement effectiveness of existing weigh station facilities. IRD (International Road Dynamics Inc.) has designed, supplied, and installed each of the 21 weigh stations in partnership with the Oregon DOT (Department of Transportation). Weigh-In-Motion (WIM) systems on the highway main-lines check the vehicle's weight and height, and automatic vehicle identification (AVI) systems check records for registration, tax status, and safety status.

If you have any questions or would like more information about the Oregon Green Light Project, please contact Mr. Rod Klashinsky, V.P. Sales & Special Projects, at 306.653.6600 or email: rod.klashinsky@irdinc.com.

IRD is a highway traffic management technology company specializing in supplying products and systems to the global Intelligent Transportation Systems (ITS) industry. IRD is a North American company based in Saskatoon, Saskatchewan Canada with sales and service offices throughout the United States and overseas. Private corporations, transportation agencies and highway authorities around the world use IRD's products and advanced systems to manage and protect their highway infrastructures.

The Company's shares trade on the Toronto Stock Exchange under the symbol IRD.
