# Road Reporter® II

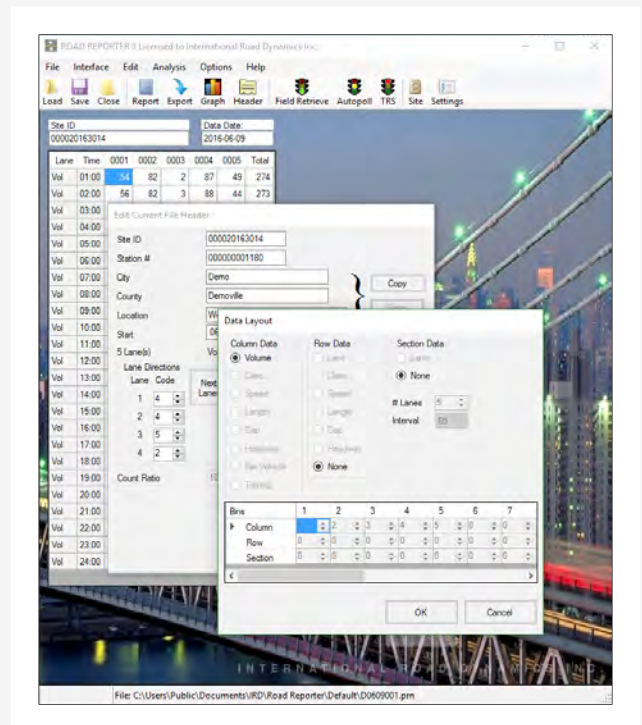

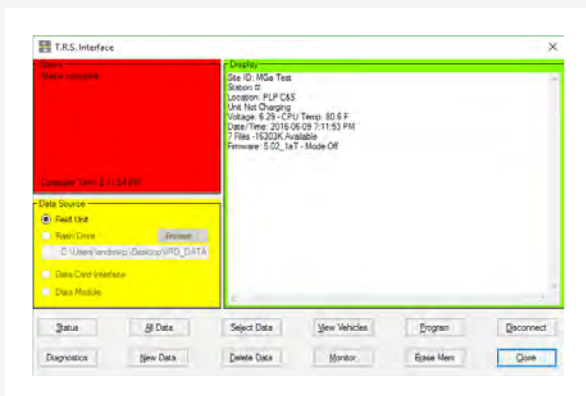

## Traffic Data Software

Road Reporter® II software is a complete traffic data analysis package comprised of storage, retrieval, equipment programming, editing, processing and reporting capabilities. The focal point of the software is the data indexing feature which allows the user to generate a single report from multiple files.

Road Reporter® II has been specifically designed for Windows computers. It is compatible with Windows 7, 8, and 10 operating systems.

### Features

- Telemetry capabilities
- Custom report generator
- Complete data editing
- Reads various IRD counters
- Import/export functions
- Data verification

## Traffic Data Software

### Instrument Interfacing

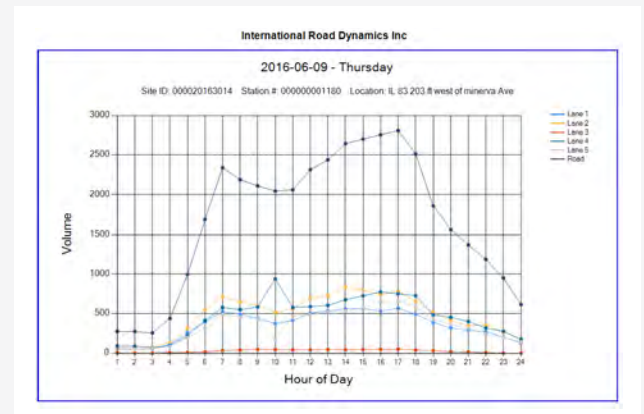

- Data collection from counters
- Data collection from turning movements
- Data collection from modules
- Real-time viewing of traffic
- Remote communications
- Autopolling

### Data Editing

- Edit header information
- Edit site information
- Site data indexing
- Spreadsheet data editing
- Add directions from other files
- Append files
- Data verification and count validity
- Remove unwanted data by date and time
- Count ratio factors
- Delete lanes

### Reporting

- Over 25 different reports
- Process volume, speed, class, gap, headway, length, weigh-in-motion and turning movements
- Daily summaries and graphs
- Weekly summaries and graphs
- Monthly and yearly historical summaries
- Annual 100 peak hours
- Statistical speed analysis: 15th & 85th percentile, median and average speeds and pace of vehicles
- Turning movement analysis summaries and graphs

**Data Verification Rules**

**Volume**

- Number of consecutive intervals being zero
- Percentage change between intervals
- Interval greater than

**Classification**

- Percentage of unclassified vehicles
- Percentage of classes 4 - 13

**Speed**

- Percentage of vehicles above max
- Percentage of vehicles below min

MAX:  MIN:

**Manual Verify** **Save** **Cancel**
